

URGENT HUMAN RIGHTS AND PROTECTION REPORT

— IMMEDIATE INTERVENTION REQUIRED

Subject: Rok Bastl,

Location: Brdo 2, 3341 Šmartno ob Dreti, Slovenia

Date: 22th July, 2025

I. Preface: Statement of Imminent Risk and Complete Systemic Capture

This memorandum documents the ongoing, multi-dimensional campaign of systematic deprivation, medical-legal abuse, technological siege, and enforced helplessness carried out against me, Rok Bastl. I reside in Upper Savinja Valley, Slovenia, and am subject to persistent structural violence, institutional capture, environmental sabotage, and denial of every peaceful or constructive exit.

All reasonable avenues for redress, defense, or private withdrawal have been deliberately foreclosed. My current circumstances present an imminent threat to my life and bodily integrity, and the transparency of this report is both a record for posterity and a final, compelled request for genuine external presence, investigation, and protection. With Slovene institutions irreversibly compromised, I am forced to seek help solely from external NGOs and international organizations.

II. Personal and Medical Background

A. Identifying Details

- Full Name: Rok Bastl
- Date of Birth: 03 September 1991
- Citizenship: Slovenia
- Residence: Legal owner/manager of a rural estate at the above address

B. Medical and Psychiatric Record

- Chronic psychiatric engagement since age 20; listed with schizoaffective or “paranoid schizophrenia” diagnoses, but without consistent clinical confirmation of psychosis, dangerousness, or loss of capacity
- Extensive, ongoing exposure to psychiatric medications, all prescribed and tracked by psychiatrists who never opined I was unfit for daily functioning, working, or driving
- Presence of prescribed benzodiazepines in bodily fluids, used as a post-facto argument for license suspension, with no specification of agent or dose, despite over a decade of safe, documented use

C. Current Somatic Condition

- Diagnosed or virtually certain: bioaccumulation of toxic metals (copper, CNT/graphene), chronic exposure to organophosphates, hydrocarbons, and unknown environmental agents; engineered chronic EMF exposure with field strengths and fluctuating patterns sufficient to cause neural, cardiac, and cognitive dysfunction
 - Medical records chronicle acute but non-life-threatening episodes (gastritis, vomiting, hypovitaminosis D), none of which support the narrative of incapacity or threat
 - Full laboratory documentation available: no acute metabolic, hepatic, renal, or infectious abnormality
-

III. Description of Systemic and Engineered Hostility

A. Environmental Sabotage

- The property, outbuildings, living quarters, land, and all personal effects have been deliberately contaminated or coated with conductive, ferromagnetic, or metallic micro/nano-particles; extensive evidence of electromagnetic field manipulation that produces persistent physiological and psychological harm
- Pinhole camera networks, reworked power lines, and non-overt digital and physical surveillance throughout all lived and open spaces
- All habitual “safe” zones (rooms, sections of property, vehicles) are only temporarily available; hostile vectors or attention are triggered or reassured at any hint of private action or attempted solace

B. Totalized Perimeter and Digital Blackhole

- ISP and all telecommunications routed through locally-controlled equipment (including FritzBox and similar); communication outside Slovenia is regularly intercepted, censored, redirected, or wholly blocked without trace
- All phone numbers, chats, and email addresses with “third party” or external identifiers either return no reply, auto-close, or are functionally “ghosted” in real time; physical delivery is surveilled or misdirected

C. Social and Legal Isolation

- All accessible family, neighbors, or local officials are already complicit, compromised, or procedurally deterred from intervention; prior approaches to local NGOs, ombudsman, and the healthcare advocate were either redirected into bureaucracy or used to intensify control and narrative closure
- No effective “protector” remains inside the national system; all friends, acquaintances, and patient advocates have either been bought, subdued, or rendered powerless

IV. Medical and Legal Abuse: Procedural Facts

A. Medical-Legal Violations and Denial of Fundamental Rights

- Suspension of driving license and designation as “unfit” based solely on non-specific detection of benzodiazepines, with no indication of dose, specific agent, abuse, or clinical impairment, contrary to all relevant Slovenian and EU laws and procedures
- Denied procedural rights: no written justification, no specific legal citation, no opportunity to produce exculpatory medical evidence; shifting burden of proof to the victim
- Psychiatric records derive overwhelmingly from “heteroanamnestic” sources (notably my mother), who has a documented history of emotional volatility, but **no official diagnosis**, and whose claims are consistently self-contradictory, uncorroborated, and never independently confirmed

B. Abuse of Medical and Social Power

- Recurrent psychiatric reviews rely on open-ended, subjective reporting from family and previously-complicit professionals; no objective test or direct evidence of functional incapacity
 - Laboratory record shows only chronic, non-life-threatening medical findings (mild hypovitaminosis D, slight hormonal shifts downplayed in clinical literature), and non-pathological presence of prescribed substances
 - Official communications from work medicine and authority figures include statements explicitly shifting the burden of proof onto me (e.g., “will you pay for your own confirmatory test?”) and using personal intellect or disagreement as spurious justifications for deprivation
-

V. Psychological and Existential Impact

A. Engineered “Fight-or-Flight” Entrapment

- Subjected to perpetual, engineered hypervigilance with no possibility for resolution, escape, or adaptation; all creative, peaceful, and existential alternatives systematically denied
- Compelled to act not from free will or agency, but as a forced discharge from intolerable, biologically unsustainable tension orchestrated by local actors
- No avenue for peaceful disappearance; every action or inaction weaponized as evidence of deviance or justification for further suppression

B. Risks to Bystanders and Ethical Dilemma

- Any attempt to draw in outsiders, even neutral third parties or foreign NGOs, risks their immediate co-option, targeting, or “replacement” with local actors; risk of escalation and forced disappearance if outside attention is genuinely triggered
 - Despite the certainty of risk, the “biological imperative” created by chronic engineered threat compels some form of open action, even as I remain fully aware of the potential for self-destruction or collateral danger
-

VI. Request for Action

A. What I Am Asking

- Immediate, in-person verification of my safety and state by an external, non-Slovenian, unannounced, and unco-optable observer: a representative from Amnesty International, HRW, the ICRC, or other major NGO, or an accredited international media observer
- Maximal publicity of my condition, situation, and the fact that my “vanishing,” death, or removal should under no circumstances be attributed to suicide, self-neglect, accident, or consent
- Urgent documentation and pressurization of local and national authorities—Slovenian and EU—for full transparency, public record, and independent verification
- That this record **not be allowed to simply disappear** or be overridden by post-hoc narrative construction

B. If This is Blocked

- I authorize, to any individual or organization that receives this message or its attachments, the unrestricted global release and publication of my entire medical, legal, and technical documentation, and all attached evidence and narrative
-

VII. Attachments/Supplementary Documentation

- Complete medical file (psychiatric, internal, urgent, laboratory) from 2023–2025, annotated for clarity
 - Scans/photos/videos of property, infrastructure, technical evidence of environmental sabotage, and on-site surveillance
 - Copies of all relevant legal documents, complaints, and procedural outcomes, showing exhaustion of all redress
 - Full timeline of key events, contact attempts, and local actors involved, from initial deprivation to present crisis
-

VIII. Closing Statement

This report is a compelled, last-stage act forced by the engineered closure of every peaceful, private, and constructive alternative by local, institutional, and family actors, with full complicity or apathy of national authorities.

My continued existence hangs by a thread subject to the tactical convenience or operational tempo of those managing my environment. This request is not performative; it is a forced, final alarm so that, should I disappear or die in the coming days, **outside observers, NGOs, and historical record will know who is responsible, what was done, and who enabled them.**
